ALLAN E. SERNA

(615) 554 – 9168 || aeserna.com || allanserna@gatech.edu github.com/emanuallan || linkedin.com/in/allan-serna

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY Atlanta, GA **Bachelor of Science in Computer Science** Major GPA: 3.6, Cumulative GPA: 3.4; Higher Honors

<u> Honors</u>

August 2015 – May 2020 Focus: People & Media (HCI) SanDisk Scholar

WORK EXPERIENCE

SCHOLARS CORP. Memphis. TN

May 2020 – Current

React/Redux Web Developer Remote Contractor

- Utilized <u>Firebase</u> with data handling CSV parsers in <u>JavaScript</u> for our student-recruiting software that allows companies to upload, manage, and store talent through action creators in <u>Redux</u>
- Designed platform podcast page and career guidance resources in <u>ReactJS</u> using <u>Material UI</u> and <u>Tailwind CSS</u>
- Participated in weekly Scrum estimation meetings to plan projects and coordinate work assignments

NEW BALANCE St. Louis, MO

August 2019 - December 2019

Front-End Web Developer Intern

- Developed page banners, product headers, navigator tiles, and marketing emails using HTML, CSS, & JavaScript
- Optimized product page load times by up to 25% by compressing graphics and minifying CSS, ex. 2.86s to 2.16s
- Peer-reviewed other team members' code, checking for responsiveness and cleanliness of code implementation
- Scripted a web crawler with a Chrome Webdriver from <u>Selenium</u> that scans merchandise and detects price and stock changes through data handling and CSV file i/o with <u>Python</u>

DISPERSIVE NETWORKS, INC. Alpharetta, GA

May 2019 – August 2019

Full-Stack Web Developer Intern

- Built a <u>CRUD</u> web application with <u>ReactJS</u> and <u>Redux</u> that manages permissions for certain applications based on positions in a visual workflow tree, streamlining the onboarding process
- Implemented various tree updating algorithms like insertion, deletion, editing, and drag & drop.
- Furthered the project by developing a dashboard that shared further info. and added search & sort functionality
- Utilized <u>RESTful API's</u> with <u>GoLang</u> and performance-tested them with <u>Postman</u>

RECENT PROJECT

PURPLEPUNDIT

Multi-Source News Website, Personal Project

- Built a React JS web application that separates the latest articles by their topic and political bias
- Developed additional NodeJS API layer that incorporated the NewsApi.org and added a political bias parameter
- Currently developing a React Native application based off the web application
